AQSA DAR

Software Engineer

+92-313-4188148 • aqsadar64@gmail.com • Lahore, Pakistan

OBJECTIVE

Highly adaptive Software Engineer specializing in Frontend Development alongside hands-on backend integration using Claude and Cursor. Passionate about learning and working with the latest technologies.

EDUCATION

PUCIT **2018 – 2020**
MSc in Computer Science (CGPA: 3.13 / 4.0)

Government Post Graduate College **2014 – 2018**
BSc in Statistics, Mathematics & Computer Science

TECHNICAL CORE COMPETENCIES

Languages & Ecosystems	JavaScript (ES6+), Python, HTML5, CSS3, SCSS, XML
Frontend Frameworks	React.js, Vue.js, Next.js, Nuxt.js, React Redux, Hooks, Router
Backend & Databases	Django, Django REST Framework (DRF), Node.js, MySQL, PostgreSQL, Strapi CMS
UI Engineering	Tailwind CSS, Material-UI (MUI), Bootstrap, ReactBootstrap
DevOps & Methodology	Git, Webhooks, Background Tasks, Jira, Agile/Scrum Matrices
AI-Assisted Tooling	Claude Code, Cursor IDE Prompt-Engineering

WORK EXPERIENCE

Grayphite **2024 – Sep 2026**
Software Engineer

- **Unified LMS & Frontend Integration:** Spearheaded the frontend architecture for a Learning Management System (LMS) using React.js to build fluid, responsive views, reusable UI components, advanced state management, client routing pipelines, and Context API isolation. Architected the corresponding Django REST Framework (DRF) backend data models, custom views, asynchronous background tasks, and webhook configurations to seamlessly handle Gumroad API third-party payment workflows.
- **Domain-Based Architecture (Martial Arts Platform):** Developed dynamic domain-based multi-tenant features loading targeted, domain-specific styling data, business rules, and components per URL, and successfully migrated legacy Vue/Nuxt.js code (converting older Vue mixins into clean Nuxt 3 composables) into Next.js/React.
- **Modern Single Page Interfaces:** Utilized React.js, React Redux, Vue.js, and Nuxt.js to build highly interactive, cross-platform client panels, admin dashboards, and access control matrices.
- **Inclusive Responsive Architectures:** Standardized fluid responsive layout rules across complex products using Tailwind CSS, Material-UI (MUI), Bootstrap, and SCSS while maintaining comprehensive web accessibility compliance.

ILI Digital PK **2022 – 2024**

Software Engineer

- **Dashboard & CMS Development:** Conceptualized, coded, and deployed modular Admin Panels, End-User Panels, and robust Content Management Systems (CMS) using semantic HTML, CSS, JavaScript, and React.js.
- **Cross-Functional Technical Translation:** Collaborated closely with Product Managers, backend engineers, QA, and mobile teams to convert high-level client business rules into definitive frontend technical architectures.
- **System Architecture Planning:** Co-designed full-stack client-side application flows, optimizing DOM manipulations, API payload fetching, application state lifecycles, and client deployment pipelines.
- **Agile Delivery Operations:** Maintained high delivery velocity within Scrum matrices using Jira software tracking systems for accurate sprint estimations, task tracking, and retrospectives.

Bloomrix **2021 – 2022**

Associate Software Engineer

- **Full-Stack MVC Frameworks:** Built scalable application frontends hooked directly into enterprise routing modules, operational controller systems, and database views.
- **Headless CMS Integrations:** Formulated decoupling patterns by scaffolding API structures via Strapi Headless CMS platforms and mapping consumption points clearly into reactive Vue.js layouts.

LANGUAGES & PERSONAL ATTRIBUTES

Languages: English (Professional), Urdu (Native)

Hobbies: Traveling, Diary Archiving
